#### INTERNATIONAL PRELIMINARY EXAMINATION REPORT

I. Basis of the report										
1. With regard to the elements of the international application:*										
		the international application as originally filed								
	$\mathbf{X}$	the desc	scription:	1						
		pages	1-6, as originall	10'						
		pages	, filed with the d	lemand						
		pages	, filed with the letter of							
ſ	$\nabla$	the clair	nims.							
		pages	1-6, as original	ly filed						
-		pages	or amended (together with any statement under Art	•						
i		pages ·	filed with the	demand						
		pages								
			awings:  1/1 , as origina	lly filed						
		pages	filed with the							
		pages								
		pages								
	t	the seque	uence listing part of the description:							
		pages								
		pages		demand						
		pages	filed with the letter of							
2.	thai	regard to the language, all the elements marked above were available or furnished to this Authority in the language in which international application was filed, unless otherwise indicated under this item.  e elements were available or furnished to this Authority in the following language which is:  the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).  the language of publication of the international application (under Rule 48.3(b)).  the language of the translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).								
3.	Wit	iminary	rd to any nucleotide and/or amino acid sequence disclosed in the international application, the interpretation was carried out on the basis of the sequence listing:	rnational						
		•	ained in the international application in written form.							
1		•	filed together with the international application in computer readable form.							
1		Ī	ished subsequently to this Authority in written form.							
Н			ished subsequently to this Authority in computer readable form.							
١		interr	statement that the subsequently furnished written sequence listing does not go beyond the disclosur rnational application as filed has been furnished.							
		_	The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.							
4		The a	amendments have resulted in the cancellation of:							
1			the description, pages							
			the claims, Nos.							
Н			the drawings, sheets/fig							
4	5.	This beyon	s report has been established as if (some of) the amendments had not been made, since they have been considered and the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**	ered to go						
1	in and	this rep 170.17).		eferred to ule 70.16						
	** Any	y replace	cement sheet containing such amendments must be referred to under item 1 and annexed to this report.

Industrial applicability (IA)

Reference is made to the following documents:

Claims

Claims

D1: EP-A-1 213 775 and

D2: WO 99/30375.

D1 discloses an organic photovoltaic component containing a substrate, a positive electrode, an organic semiconductor and a negative electrode (see figures 1 and 2), a transport layer (layer 4) being structured between the electrode (3) and the semiconductor layer (5) (see figure 2). The claimed component is also known from D2, all the layers, including the substrate, being structured (see figure 2 and page 7, lines 11 to 19). Thus the components known from D1 and D2 display all the features of claims 1 and 3 of the application. Consequently the subject matter of these claims is not novel (PCT Article 33(2)).

The structuring as per D1 or D2 of the semiconductor layer (5 in D1, 202 in D2) of the component is also achieved by retaining existing structuring of a lower layer (4 in D1, 204 in D2), to which the semiconductor layer is applied. This lower layer has to be considered an additional layer. Furthermore, as figure 2 of D1 clearly shows, the

Internatio plication No.

PCT/DE 03/02930

semiconductor layer planarizes the structuring of the lower layer. Claims 4 to 6 do not meet the requirements of PCT Article 33(1) since their subject matter is not novel (PCT Article 33(2)).

The substrate selected in D1 can be a flexible film (paragraphs 0068 and 0071); according to D2, the substrate can be structured (page 7, lines 17 to 19). A person skilled in the art would consider it conventional procedure to combine these features. Therefore the subject matter of claim 2 does not involve an inventive step and hence does not meet the requirements of PCT Article 33(1) and (3).
